

About the Seminar:

The National Education Policy 2020 needs to be implemented by teachers for it teachers are required to be highly effective with active involvement of educators who are to be multidisciplinary and multilingual themselves.

As Radhakrishnan stated about teachers,

"True teachers are those who help us think for ourselves"

We know that the Govt. of India announced a long-awaited education policy on July 29, 2020 to improve access, equity and quality of education in the country. The NEP is visionary, practical, progressive and comprehensive. It has a range from early childhood to higher education, professional education to vocational education, teacher training to professional education. As policy envisages that the teacher must be the center of the fundamental reforms in the education system, the NEP 2020 must help re-establish teachers, at all levels as the most respected and essential members of our society because they truly shape our next generation of citizens. NEP 2020 reforms everything to empower teachers and help them to render their services as effectively as possible.

Teacher education is the combination of Teaching skills, Pedagogical theory, and Professional skills. Teachers are needed to be having best minds in order to provide the right guidance to the students. For that, teachers also need to keep learning through different programs.

As the country begins to work on implementing the policy, it is imperative to understand those aspects of Teacher Education which is prominently considered and their implications. Thus, the prime objective of organizing this seminar is to provide a common platform to discuss its ideas, objectives, and deliberate over the concern of NEP 2020.

Broad Themes:

- Reforms in Teacher Education post NEP2020.
- Integrated Teacher Education Programme (ITEP).
